N. M. WADIA INSTITUTE OF CARDIOLOGY

DUM SPIRO SPERO

PATIENT SAFETY & QUALITY OF CARE NABH ACCREDITED
National Accreditation Board For Hospitals & Healthcare Providers

DEPARTMENT OF ECHOCARDIOGRAPHY

NAME OF THE PATIENT	:	**MR. RADHE SHYAM MITTAL – 113258**
AGE / SEX	:	**58 YEARS / MALE**
REFERRED BY	:	**DR. D. B. GAWARE**
TEST PERFORMED / DT.	:	**BEDSIDE ECHO SCREENING - 02.04.2019**

MITRAL VALVE : has thin leaflets, normal subvalvar structures and normal motion.

AORTIC VALVE : has 3 thin leaflets with normal opening. Aortic root is dilated.

I.V.S. & I.A.S. : are intact.

LEFT VENTRICLE : is normal in size and thickness. Mid anterior, mid IVS, apical IVS, apex and apico-lateral segments are thin and severely hypokinetic. Inferior segment is hypokinetic.

LEFT ATRIUM: is normal in size and free of clots.

RIGHT VENTRICLE & RIGHT ATRIUM: are normal.

C.F.I. SHOWS : mitral diastolic velocities are altered. There is trivial M.R.
Tricuspid diastolic velocities are normal. There is no T.R.
Aortic systolic velocities are normal. There is no A.R.
Velocities across pulmonary valves are normal.

IMPRESSION :

- **NORMAL LV SIZE WITH MILD CONCENTRIC HYPERTROPHY.**
- **ANTEROSEPTAL AND INFERIOR INJURY.**
- **COMPROMISED LV SYSTOLIC FUNCTION – VISUALLY ESTIMATED 2D LVEF ABOUT 35-40%.**
- **TRIVIAL MITRAL REGURGITATION.**
- **DILATED AORTIC ROOT.**
- **NO PULMONARY HYPERTENSION.**
- **NO THROMBUS / VEGETATION / PERICARDIAL EFFUSION.**

DR. D.B. GAWARE
MD,DNB(CARD.) FACC
Cardiologist.
