DEPARTMENT OF ECHOCARDIOGRAPHY

NAME OF THE PATIENT	:	**MR. R S MITTAL (REG NO: 113258)**
AGE / SEX	:	**58 YEARS / MALE**
REFERRED BY	:	**DR. D. B. GAWARE**
TEST PERFORMED / DT.	:	**COLOR DOPPLER - 21.02.2019**

MITRAL VALVE : has thin leaflets, normal subvalvar structures and normal motion.

AORTIC VALVE : has 3 thin leaflets with normal opening.

I.V.S. & I.A.S. : are intact.

LEFT VENTRICLE : is normal in size and has increased wall thickness. Basal inferior and mid infero-posterior segments are thinned out and hypokinetic. Other segments contract normally.

LEFT ATRIUM: is normal in size and free of clots.

RIGHT VENTRICLE & RIGHT ATRIUM: are normal.

C.F.I. SHOWS : mitral diastolic velocities are altered. There is no M.R.
Tricuspid diastolic velocities are normal. There is no T.R.
Aortic systolic velocities are normal. There is no A.R.
Velocities across pulmonary valves are normal.

IMPRESSION :

- **NORMAL LV SIZE WITH MILD CONCENTRIC HYPERTROPHY.**
- **INFERIOR AND POSTERIOR HYPOKINESIA.**
- **MILDLY COMPROMISED LV SYSTOLIC FUNCTION – VISUALLY ESTIMATED 2D LVEF ABOUT 50%.**
- **LV DIASTOLIC DYSFUNCTION.**
- **NORMAL VALVES.**
- **NO PULMONARY HYPERTENSION.**
- **NO THROMBUS / VEGETATION / PERICARDIAL EFFUSION.**

DR. D. B. GAWARE
MD,DNB(CARD.) FACC
Cardiologist.
